

15 kW

Industrial Air Solutions for Workshops & Light Industry

15 kW Screw Compressor – 10 Bar

Our 15 kW screw compressor is designed to deliver reliable and continuous compressed air for workshops and light industrial applications across Saudi Arabia. Powered by Italian engineering from FINI, this compressor operates at 10 Bar, ensuring stable pressure, energy efficiency, and long service life. This model is ideal for customers looking to upgrade from piston compressors to a more efficient and quieter screw compressor solution.

Technical Overview – 15 kW (20 HP)

- Power: 15 kW / 20 HP
- Working Pressure: 10 Bar
- Type: Fixed Speed / VSD (optional)
- Duty Cycle: Continuous operation
- Cooling: Industrial air-cooled system
- Power Supply: 380V / 3 Phase / 60Hz

Applications in Saudi Arabia

The 15 kW screw compressor is widely used in:

- Automotive workshops and service centers
- Tire shops and car wash facilities
- Small manufacturing units
- Woodworking and carpentry shops
- Light industrial pneumatic tools

Why Choose This 15 kW Screw Compressor?

- Italian screw technology with high reliability
- Lower noise compared to piston compressors
- Reduced energy consumption
- Continuous air supply without pressure fluctuation
- Local service and spare parts availability across KSA

Lubrication
Lubricated

Air outflow
1850 l/min.

Max. pressure
10bar / 145psi

Power
15 kW
